

## PEDAGOGICAL ACTIVITY AND ITS CHARACTERISTICS.

Zakirov Mirzarakhim Abdaliyevich .

QDPI teacher .

**Abstract** : This in the article pedagogue - teacher , teacher young to generation education to give with engaged in person as , education process learner and this the process manage problems with engaged in expert as embodiment light up given

**Key word** : Pedagogue , teacher , person , education , pedagogue activity , activity .

Uzbekistan president Shaukat Mirziyoyev teacher and coaches are celebrated on October 1 occupation holiday with good luck it is own in his speech their society prospect on the way labors great that confession reached , this thoughts stated was " You guys in the world the most priceless wealth and eternal inheritance create it to our people , sprout and grow coming young to our generation inconvenient deliver on the way really devotion showing work doing without great people . This is huge wealth is intelligence and science , this immortal inheritance is good is education » , - is called in greeting .<sup>1</sup>

" In our country last in years science and education field state of politics priority direction to convert focused on the family a child from birth from , perfection to his age to reach until him every bilaterally that supports , in life worthy place to find service who does whole and continuously system is being created » , - saying note did state leader

" In our society Kindergarten educator , school teachers , university professors and scientific and creative intellectuals today we are striving Third of the Renaissance four support recognized as a pillar we are doing » , - saying note did President . He is a teacher and of coaches respect increase , in particular , the teacher and of teachers value , honor and pride recovery is difficult and honorable work material and spiritual encourage according to started things new to the step to raise a promise gave

Confession reach necessarily , none one mechanism teacher , intellectuals such as society develop to get strong feature have it's not . The teacher activity purpose the most first of all to young people education give them society goals and the future for worthy a person as from upbringing consists of In this place pedagogue the root meaning of the word and essence from what consists of said question is born Teacher of the concept content expression different study sources to himself special in appearance manifestation will be

Pedagogical terms in the dictionary pedagogue to the concept as follows definition given Pedagogue - teacher , teacher . Young to generation education to give with engaged in person Education process learner and this the process manage problems with engaged in expert as is embodied . Pedagogy specialist - children and young people bring up and teaching with engaged , that's it field according to special preparation have was is a person .<sup>2</sup>

<sup>1</sup> Sh.M. Mirziyoyev September 30 , 2021 teacher and to the coaches dedicated solemn from the speech .

<sup>2</sup> RHDjurayev , O'. Tolipov and others " Pedagogical terms dictionary " . Tashkent. Science. 2008.

Teacher of activity from the content come out of his professional purpose and the content is also determined .

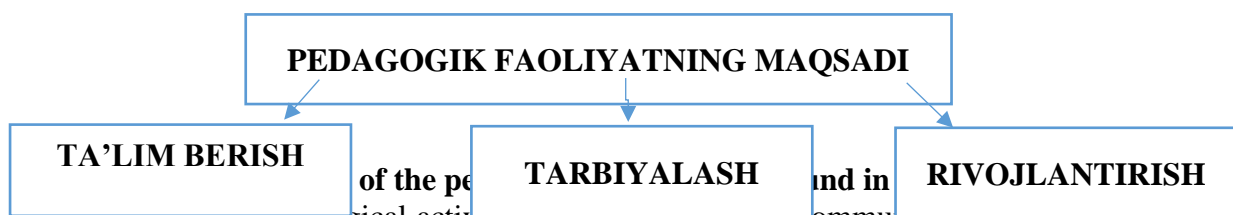

Activity concept psychological point of view from the point of view - of people external to the world active relationship the shape of a person himself himself to the goal according to way change method , human of existence important from the features one Only activity only in the core a person essence manifestation to be , of society , each how social of structure existence provision can

Teacher of the person professional activity content young to generation education and education to give since , his content more precisely to express important State and of society xar always own citizens education upgrade based on the country in all fields development purpose there is is this the goal done increase of pedagogues undertake honorable task as loaded Teacher personality education in the content reflection reached requirements based on young generation consciousness , outlook , behavior , thinking process and to know to the process effect shows . So pedagogue of activity in the content state and of society goals incarnate and reflection is enough This is above considerations based on pedagogical activity social activity as state and person integration to the body bringer factor as evaluation can

Pedagogical activity is a professional activity of a teacher aimed at providing education and training to students , solving their tasks and using the means of pedagogical influence. In this activity, the teacher teaches, guides, organizes educational activities, promotes the decrees of the President, the government, and acquires independent knowledge to improve his qualifications. plans, as a result, he improves himself and the students as well.

Pedagogical activity is the work activity of people who are responsible to the people and the state, and are specially trained to educate children. The activity of teachers serving at all levels of the continuing education system is aimed at forming a human personality.

Pedagogical activity is a special form of systematic actions organized by the teacher according to professional goals. It is appropriate to express the purpose of pedagogical activity as follows:

1. The goal of the pedagogical activity is determined by the community, that is, the result of the pedagogical activity is related to the interests of the community. It is necessary that his work should be directed to the development of the individual in all aspects. Pedagogical activity ensures the social integrity (sequence) of the generation, transfers the experience of one generation to the next, directs children towards social relations, and realizes the natural possibilities of a person to increase social experience.

2. The teacher's activity is always related to the management of the individual's activity. In this case, it is important that the pedagogical goal is connected to the student's goal. It was not easy to achieve it. It is necessary for the teacher to clearly imagine the goal of his activity and the ways to achieve it, and to be able to explain to them that achieving the goal is also important

for students. As Guote said, "Speak with confidence, and both the words and the audience will come naturally."

3. The main activities of the pedagogue are aimed at improving the personality based on its development and influence. In the process of systematic and consistent education and upbringing, it creates the process of exchanging the old qualities of a person with new ones.

4. Management of the student's activity in the pedagogical (education, training) process is complicated because the goal of the teacher is always directed towards the future of the student. This goal is better understood by the pedagogue than the student. In many cases, the student, due to the lack of experience, is busy with the worries of the present day, and could not fully imagine the future. Sh.A. Amonashvili, one of the creative pedagogues, calls this inconsistency "a basic tragedy in education". Realizing this, skilled pedagogues adjust the logic of their activities according to the needs of students. This is the essence of cooperative pedagogy.

5. Pedagogical activity is characterized as a creative profession. There is no limit to pedagogical creativity. His activity is polished in the process of creative activities such as research, innovations, methodical creation, modernization of relations.

Peculiarities of a teacher's activity are reflected in his personal and professional characteristics: Peculiarities of pedagogical activity are explained in S. Saidov's article entitled "Main features of pedagogical activity" as follows:

- creation of knowledge, production, research, preparation of developments, examination, search for innovation, etc.;
- Education of the process all stages knowledge control to do
- textbook , study manual and another educational method materials , scientific articles preparation through knowledge distribution ;
- students education , his identity formation and development .

Pedagogical of activity counting passed all features one hilda important have they are mutually in relation develops .
