

ISSUES OF FORMATION OF YOUTH SPIRITUALITY IN A HIGHER EDUCATIONAL INSTITUTION

Razikova Lola Tuychiyevna,

Candidate of Philology, Associate Professor of the Department of Pedagogy, Psychology,
Samarkand State Medical University

Annotation. In this article, the issue of educating the culture of reading in the formation of the spirituality of young people is raised, and the work carried out by the state in this regard and the practical work on their implementation are analyzed.

Keywords: works of Oriental scientists, book, reading culture, spirituality, artistic work.

Introduction. Thanks to independence, Uzbekistan has restored its role and importance in raising the spirituality of society on the basis of national and universal values. Because only people with spiritual perfection can restore a developed society.

In the implementation of this important task, the development of student-Girl Reading is of great importance. After all, mothers in Uzbek families have a unique national experience in educating the younger generation through books.

The adoption of the Presidential Decree of the president of the Republic of Uzbekistan on September 13, 2017 “on the program of measures to develop the system of publication and distribution of Book products, increase and promotion of reading and reading culture” by the president of the Republic of Uzbekistan Shavkat Mirziyoyev further intensified the reforms carried out in this area. After that, special attention was paid to raising the culture of reading, which is of invaluable importance in raising the moral and spiritual potential of our people, especially the younger generation, in raising awareness and worldview, bringing up a harmonious person who lives with a sense of love and loyalty to his native land and people. Children's literature is a powerful weapon of our country in educating students as young people of faith and in the spirit of love for the motherland.

In today's time, the aspiration, interest, study, mastering of this science has increased even more. Therefore, it is necessary that the artistic work written for the pupils correspond to their age characteristics, levels, they evoke deep thoughts in their hearts, are rich in bright images and high ideas, inspire them to great and bright works. Most importantly, the topics should be covered in an understandable, simple and interesting language. Only truly artistic works have a strong impact on children and are able to meet these requirements. Therefore, such books are of particular importance both from a pedagogical and psychological point of view. Children's literature is primarily based on the artistic language in the performance of this task. The language of the literary work is a means of revealing its ideological content clearly and expressively. Written in a good, clear, fluent, imaginative, rich language, the work quickly and easily conveys the writer's goals and thoughts to the readers. The great thinker Alisher Navoi describes himself as a "lock of the treasure of hearts" "in the work" "prisoner-ul-lock", urging people to speak with a short and librarian meaningful, deep logic. This demand is undoubtedly attributed to children's writers.

Islam religion develops the intellectual perfection and thinking of mantirishga is also given great attention. These are evidence proving the science and truth that Islam is a religion of clarity, seen as an enemy of imitation. This is a sign that every thought should be based on reason, not by reason.

Even in the hadiths, science is viewed as a criterion of human spiritual perfection.

It is shown that the perception of a person, his worldview, the extent to which scientific knowledge is lost are an important factor in his future development as a person of interest to humanity and society. Because if a person without knowledge is ignorant and ignorant, knowledge has not developed in society it is said that ignorance, humiliation will prevail.

Children's writer should be able to write simply, fluently, interesting and content. For this, it is necessary to know the language of the people. Works of art written with fluent language also have a great influence on the speech of a young reader, increase vocabulary. The best books of children's writers teach the younger generation to love nature, live honestly, master the peaks of science, make useful new discoveries for the people.

The book introduces the achievements of our people's past, advanced culture, science and technology, grows their sense of pride. Of course, reading is also not an exaggeration to say art. Because, there are specific difficulties and difficulties in reading. He achieves the level of "bookkeeping" to the one who overcomes difficulties. In most cases, the reader's question comes side by side with the "Read" question. Both words mean acquiring knowledge in general terms, learning knowledge and acquiring knowledge. There are several factors that increase spiritual potential in young people, from which the role of reading is of particular importance. There is such a sheet in the "knowledge of salvation":

- Elig is surprised at something:

At the time when the father of the son died, this young man remained very young. But where did this perfection, the mind zakovat in it come from? How do knowledge connoisseurs learn? What is the way of wisdom? With these questions of his own, he appealed to the son-in-law.

Elig-the guy who started that word. - Those who are blessed

popular among, the name is spread:

The blind, the noble prayer I received from my father,

I noticed that the word of prayer fulfilled

Elig is definitely the reason for this,

Knowledge-skills aside.

The way of wisdom is to know, to learn information in different fields. Knowledge

The reached wise ones touches also a lot of nafi on the elga. His wishes also do not apply if he does not have an education at the time of birth.

Let my child take the path of wisdom,

From small to large, hands on knowledge.

If the child Ducks knowledge from small, then his perception will also be good,

Knowledge brings a person higher, glory to him.

Because of the two, the Almighty is man,

They always start to do justice.

A person with knowledge is a loser animal,

What is greater, Where do you say?!

Hence, the fact that the wisdom of Yusuf Xos Hajib man is the result of his knowledge and the fact that this knowledge is caused by the father, give each child knowledge from the smallness of the father he expressed truthful opinions about the necessity.

Reading is the art of reading and Learning Media, a book, a magazine, a newspaper and other types of writing, which includes all the information and knowledge that serves humanity. The formation of a culture of youth reading gives an opportunity to express its independent opinion on the changes taking place in this state and society. One of the five initiatives being promoted by the president of our country, the fourth eutrema, is also aimed at raising the spirituality of young people, organizing systematic work on the broad promotion of reading among them.

In the development of children's reading in the 21st century, the following works are carried out on the scale of our school:

- To ensure that students are an active member of the library;
- Book fairs organization;
- Carrying out cooperation with the activities of mobile libraries;
- New literature views;
- "Have you read this book?" the spectacle;
- Views of books on the basis of their works by writers and thinkers at birth.

In conclusion, the personnel with high potential, their independent outlook, initiative, healthy and spiritually mature are the decisive force of the reforms carried out in the system today, the defender of the true meaning of our people. And in the formation of such positive adjectives, it is important that they are related not only to their professional activity, but also to read books of different genres, to have their own knowledge and outlook.
