The process of raising a person in every direction, his mind, behavior and worldview on the basis of socio-historical experience, and the social and historical experience. When it is interpreted, the education is a process of intensity for the educator Abdullah Avloni, while the study of the younger generation is such a friendly words: "The upbringing is for us yo life or yo The purpose of salvation is to be saved, or a problem or blade. Forming a comprehensively harmonious person. The content of education means the knowledge, skills, belief, quality and quality of personality and personality, and behavior system. The process is the process of cooperation between the educators and purposes.

In the course of the training, the educator is formed, feelings that develop, develop the necessary social contacts for social life and will have a number of knowledge, skills and skills in the training process. In the course of the training, educators with rich life experience in this regard are very important that children in pedagogically organize the lives and activities of children. A practical pedagogical process aimed at the formation of specific physical, psychiatric, moral, moral, spiritual qualities in Teshakhs. The sum of the measures to ensure that a person can have the necessary features necessary to live in society. The head of state is in this process Sh. Mirziyoyev said, "If you ask me what we will suffer from me, the words of our children today are reflected in these words that our children growing every reason why our young age is important.

It should be noted that the purpose of its development is determined to bring up the main purpose of the upbringing of its development in the direction of its development. For

example, it is very important to form a sense of responsibility for students who are primarily training, secondary education. The consistent, continuous, systematic, systematic and stripulation of the educational process is effective in forming global glomance in this process in this process. It is a guarantee of the purpose of the purpose of doing with all the existing factors.

The high spirituality in the younger young AVI is the demonstration of the spirit of formation of thinking, environmental awareness, and vigilance. The reason is that perception of thinking analyzing is likely to become a young generation that does not have the task, which does not have the ability to think. Therefore, we must need to use the skill of our pedagogical potential to prevent future generation homeless as manausups. They are not appreciated by free true rights and values for man. Every spiritual conscious person must be a feeling of pride from his homeland and attempts to be worthy. Whether we are proud of our Materaassey, we need to ask ourselves to be proud of us. The education of the person is an current social and pedagogical problem. Accordingly, the development of the developing young generation is necessary to provide integration between educational and subjects between education and subjects between educational items in the requirements of society. It is not permissible for a person to create goodness from self-sufficiency, but it is very important that the role of education in man rise. The issue of humanity, their lifting from defects has been an eternal issue of our ancestors. The person is known that the state and level of the spiritual nature of human nature can affect society differently since ancient times. Therefore, depression, stagnation, non-economic, political factors in society should also be seeking a higher level of moral path of the world of consciousness, not only economic, political factors.

Parents are not only to teach the duty to the child to a child only beautiful moral, but also from the parental duties from various ideology and unusual ideas. Because the faith is healthy, and the ideology is as a dedicated person to his parents, and the role of the environment is not only the environmental peers and education. It is one of the duties of the parents, physically healthy and enerforcing their children. He must engage in raising a child before he sees even the face of the childhood. The fact that our people have been upbringing in ancient times, according to the fact that the head of the building will remain a crook, even if the head of the building reaches the stars. So in society, a person is not important in society, not material riches, but a high spiritual image. The ancestors today, today, the spirituality is toherit from our fathers. The conditions created in the implementation of any educational work in accordance with the hygienic rules of students will play an important role.
