

VOLLEYBALL IN THE EXAMPLE OF FUTURE PHYSICAL EDUCATION TEACHERS PROFESSIONAL ACTIVITIES IN INNOVATION THE EFFECTIVENESS OF THE APPLICATION OF CLUSTER METHODS

Boltaev Shamshodjon

Chirchik state pedagogical university,

“Physical culture methods and sport” of the department of teacher,

This article provides information on the professional activities of future physical education teachers in the cluster on the basis of the application of an innovative approach, as well as the volleyball player of the improvement of technical skills through the effective organization of the training process.

Keywords: physical education and sports, volleyball sport, volleyball player, young, training, process, technique, ipoll ski, innovative, cluster, metho.

Uzbekistan, republic of the education sector reform to the complexity of the main goals of the one – pedagogical personnel time requirements suitable manner to the preparation, each fully developed perfect individuals from educating is. Uzbekistan Republic President on 28 January in the year of 2022 “2022-2026 to designed New Uzbekistan's development strategy on” UP-60-dated decree in education the quality of increasing on a few tasks defined were.

In the republic the last years, in physical education and sports popularization, the population among healthy a lifestyle promote to, options are limited to a person's physical rehabilitation for the necessary conditions to create and of the country in the international sports arena, likely involved that are to ensure order in consistent measures implemented are being.

Modern teacher how to be a need? Independence early days of starting this problem on many teachers and psychologist scientists own thoughts and your comments with out. Teachers professional skills of national traditions and customs, and our values come out of further improvement, their teaching activity present time requirements at the level of further improvement for methodical instructions, the brief appearance is. The present day also this problem on scientific research, scientific research to continue continues.

With the development of science and technique innovation as severe as a result of the implementation of the goal of all sectors, ultimately aimed at increasing the capacity of the country's economic and social, template, get ready, the creative use of them will give better results. Today the economy in that proceeding was tested in production sectors of the economy of the country and international experience a large role in the development of executive attention is given to innovative practices to apply serious. One of such innovation “**cluster model**” is a more agrarian today in Uzbekistan, has wide application in to'qmachilik and light industrial sectors. Promising direction in the economy in the short term, the cluster model is recognized as an innovative experience in other areas and applying this model are carried out.

Methodology. Education in relation to the study and analysis of the cluster approach in the area of research works in this direction, how many times gave me the chance to look up at your country. Therefore, the cluster approach is this:

- a particular area (education, economy, etc.) if you are interested is put effective competitive in areas that have a mechanism of enhancing the organizational form of the united;
- a number of optional components, which consists of several equal pieces, which maintain the ability of constructivism in his fully functional structure;
- education-science-production system to support innovation in forming means;
- the organization for the future economy of human resource capacity development in the form of an effective method of organization innovation;

Education by clusters formation and development of Russian scientists of the theoretical basis of the study was conducted in the following areas:

a) of the cluster approach in relation to professional education (B. Pugacheva, a. v. Leontiyev);

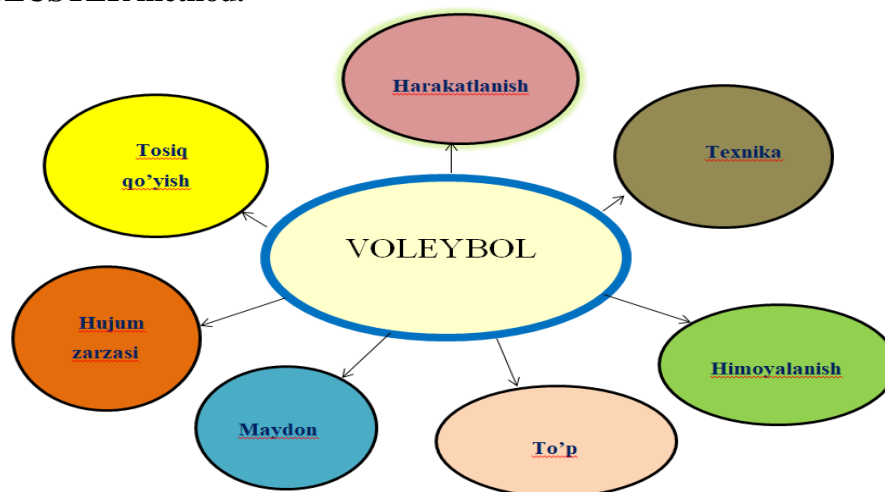

Worth mentioning, the head of the state physical culture and sports are also a number of areas of this initiative with the introduction of done “for the five priority development of the republic of uzbekistan in 2017-2021 in the direction of action for the implementation of intended strategies, social and spiritual spheres in five of the initiative of the president was introduced, 2017-3 years-on July in “on measures for the further development of mass physical culture and sport” pp-3031-dated, 2018-5 years-march in “measures for improvement of public administration system in the field of physical culture and sport on the up-5368-decree dated the same as the other has begun to form within the framework of the requirements of the documents konseptual.

As it is known, in the game of sports, including volleyball in sports all the technical-tactical actions to perform on the basis of extreme and severe in quick changing situations is required. Consequently, conducting training for volleyball, technical-tactical actions in the process of dramatically changing the quality of efficiency using exercise routine to teach directions to go form worthwhile. Young athletes to enhance their training and skill, is related to how the organization of sports training and conduct. In organized sports classes, the study of the personal characteristics of the athlete, it is necessary to know the technical and tactical preparation. in conjunction with this young volleybalist meaningful innovation in the example of the efficiency of educational technology and specialized in the development of the quality it is desirable to use wider harakatli games. The above-mentioned thoughts from coach for the full implementation of the desired knowledge and skill is required. The young generation of the requirements to be engaged in physical education and sports of the times created the conditions regularly, sports competitions through the will of their young, the power and the opportunities that reflect real confidence, masculinity and patriotism, mother-feelings of loyalty to the motherland to find identities to explain the systematic organization of the work of the talented athletes from among them, targeted preparation in the field of selection and extensive work has been done.

Volleybalist technology training and effective training-training process planning and management, physical and technical-tactical preparation to assess the level of sports results in the formation of effective activities, conducts research on the control of training and competition before the competition. Qin the house volleyball sport type on the cluster model worked out has been. This model volleyball sport - type related terminology use without volleybalist of thinking of scope and interest of increasing the goal has been.

CLUSTER method.

Conclusion. Any anticipated innovation in the field of physical education and sports, scientific and technological development, personnel potential, graduate, education and specialist areas-social science in a complex planned new directions (diagnostic) and control business korreksion associated with the pharynx. Innovative developments in any area which is created in the direction of the scientific-methodological, administrative, physical education teachers and sports trainers for business software.

Higher education system in uzbekistan in the conditions of today such has become a vital necessity to be created as a new mechanism, which control the interaction between the types of education, and also to be satisfied it is necessary to ensure the interests of even competition. The modern requirements of higher education out of high social importance of the sustainable development of society, the problems and addressing them in the system, in education, science and production networks between continuous pedagogical education, the necessity of the transfer taqazo tarqoqlik cluster development model continues today.

Volleyball training for conducting the technical-tactical actions in the process of dramatically changing the quality of efficiency using exercise routine to teach directions to go form worthwhile. Young athletes to enhance their training and skill, is related to how the organization of sports training and conduct.
