Abstract: This in the article, social demographic groups about information and social demographic of the group big features about information given their Women and children features about wide data given passed.

Key words: demography, protection, importance, development, problem, comprehensive, measure event

Mother and child protection Uzbekistan Republic head of state and society members for important importance occupation is enough From this except, Islam women in religion too and of children their protection value high is considered That's why for, our country to independence from what he achieved after family, mothers and to the children directed wide comprehensive measures in the eye caught programs work developed Since 1998 Scientific-practical "Family" in Tashkent center activity show started this in the center in Uzbekistan the family formation and demographic to develop about problems about wide network affairs take will go State by young with a child mothers the work hours limited to them incomplete the work on, incomplete the work week, as well as necessity come out to themselves comfortable in hours or at home work possibilities is given Har one mother and child health observation, to them qualified medical help show also state in charge of is considered Healthy generation bring up in order to state bodies, organizations and institutions by before school education, school, boarding school school, children health complexes such as different networks is being developed.

Family, mothers and the children protection do 2 main department: obstetrics-gynecology (birth help give) and to the children treatment-prophylaxis help show organize to do own into takes Obstetrics-gynecology help special institutions, especially in the city maternity hospitals are also included Women consulting room was maternity hospital complexes, hospitals obstetrics-gynecology departments, obstetrics and gynecology institute, medicine institutes of obstetrics and gynecology department contained that's it field departments, women consulting room, polyclinic and work release enterprises medical sanitation part under obstetrics-gynecology cabinets done increases. Village in places to women obstetrics-gynecology help region, district of hospitals maternity hospital departments, ambulatory, paramedics points and in the polyclinic obstetrics-gynecology cabinets shows.

Women consulting room own in the area polyclinic, pregnant women health institutions, "Mother and child screening" center and perinatal centers, medical-genetic centers, as well as "Marriage and family" consulting offices, family and children polyclinics, many network of hospitals specialized departments with organic depends without activity shows.

Family, mothers and the children protection to do in the system treatment-prophylaxis of help one how many stages there is:

1st stage - young people sexual to issues preparation, healthy family erection, sex life genetics and sexual road through contagious from diseases you know reach according to high qualified medical help show "Family and marriage" scientific consulting rooms done increases.

2nd stage — antenatal protection of the fetus complex measures done increase Women consulting room, maternity hospital complexes and others to the activity enters

Stage 3 — giving birth fluffy to take away the fetus instituteranatal protection is maternity hospitals undertake loaded.

Stage 4 is new was born baby health protection to reach, him breastfeeding, general condition, physiological development control to do and other maternity hospitals babies in the section out of sight sorry will go

5th stage - before school age children health protection to do

6th stage - school age children health protection to do All of these Uzbekistan in the Republic to the road placed the only one Family, mothers and children protection to do in the system step by step done is increased. In our republic activity showing Obstetrics and gynecology Institute of Pediatrics Institute, "Mother and Child" Hospital and centers as well to the field about series treatment-prophylaxis in institutions scientific research take will go Labor resources of use important criteria one is this of the population to work activity, social work was busy issuing to work capable of the population is the weight .

Demographic in the processes, of the population sex-age composition and of the family size, population in action, as well as labor qualified, economy conduct forms and of the population and population of their addresses in the location important territorial differences of nations material and spiritual culture with closely depend Society development during birth historical periods and regions according to regularly changed came Many children society state supported by Most first in the family of the child economic role very big was. Even some in countries, for example, Russia to the peasants work for to be given the earth is also children to the number looking was distributed. Such in the circumstances, by itself apparently as har one family children the number from multiplication interested was Har one family of the member healthy to be, new born of the child healthy and health big to be How important economic and that it is a moral issue all of us good we understand. Our government leader by Maternal and Child Health protection make, healthy generation to form circle addition measures, population reproductive health strengthening, birth of a healthy child, physical and spiritual perfect generation adult deliver regarding things more strengthen and efficiency increase measures in our country of families social stability, well-being on the way take going of measures efficiency more increased.

Summary by doing that's it to say maybe family peace society and of the state stability, motherhood and childhood generations of endurance important is a factor. Independence because of they are new meaning occupation did In this family, motherhood and childhood protection of doing legal the basics create, mothers and children rights guarantee, families stability to provide to reach separately attention was directed. "Uzbekistan in the Republic to young people about state policy basics on", "Child's rights guarantees about". of laws acceptance made, "Healthy generation for" order establishment "Children's rights" of the UN about". convention ratification what is done is family, motherhood and childhood protection more strengthened. At the conference "Healthy mother and child year" State in the program in the eye caught tasks and their to the performance separately attention was directed. Family, motherhood and childhood protection to do according to formed legal and regulatory sometimes improvement about done being increased affairs analysis done Future the bride and

groom medical out of sight transfer according to responsibility boost, early to marry exit of cases prevention get, girls to the profession have being and life realize marriage dry for conditions Create current important yes, that's all they are in life his own worthy place finds, our society active to the member will become, tomorrow he will build the family is also strong will be Such good intention done app reach on the way state and public organizations, in particular, neighborhood, women, intellectuals, youth organizations in the middle cooperation is being strengthened.
